

World War II Wave AG

AG3 Lucile Posner

I have been in contact with the Aerographer's Mate 2nd Class who served during WW2 as a W.A.V.E. member, Lucile Posner.

I scanned her photos for all of the AG community to see. She served from 8/43 - 12/45 and was discharged as Petty Officer Second Class.

Bootcamp for her in Hunter College in the Bronx during WW2 as a W.A.V.E.S. member.

She went to train for meteorology (Aerology back then) in Lakewood, NJ.

She was stationed in Naval Air Station Norman, Oklahoma and then Fairfax Field the "Navy Elimination Air Base" in Kansas City

Then she was stationed in the Bureau of Intelligence Naval Communications Annex in Washington, D.C. to help decrypt Japanese weather code.

She was honorably discharged in Corpus Christi, Texas

She told me she chose to become an AG because she was so interested in meteorology. I salute her because she paved the way for the U.S. Navy's meteorological field the Aerographer's Mate.

More to come.
