### **1976 T**

Whenever the smart bastard changed the numbering system from annual to fiscal year, consideration was NOT given to the vagaries of our Federal Government's inability to balance the budget as law requires. In 1976 the Fiscal year changed from 1 July to 1 October. In keeping with Fiscal year policy, the Numbering system was given T identity, presumably for Temporary, for 4 classes between July and October 1976. This indicates to me that Aerographers who determine policy are less intelligent than our Federal Congressman, something that is amazing. I always thought AG's were too smart to be roped in by Congressmen's bumbling! ZEJ
