

## OA Division USS John F Kennedy 1981-1982

### Radio Receivers

Upper right is the 1051 receiver and lower right is the R-390. Bottom right is the patch panel. To the left are the RTTY converters and lower left is another 1051 receiver.

I always favored the R-390 as I could get the AM broadcast band and the LW band for European radio stations. We jury rigged a speaker to plug in during off-data hours so we could have some music.
